Engagement and support of the academic mission of the university is a simple way to stand out as a leader on campus and one that the Leadership Lehigh program values as important to ensure a well-rounded student leader experience. By attending a variety of intellectually stimulating offerings across campus, (ie. visiting lecturers, theatrical or musical performances, dialogs sponsored by offices and academic departments etc. ) students will be exposed to diversity in thought, which will enhance their ability to critically think about their role as a leader and what effective leadership can look like in action across many disciplines.
