

Student Affairs Assessment Committee

October, 2010

Charge

The Student Affairs Assessment Committee has been created to provide oversight and leadership for assessment efforts across the division. The committee is charged to:

- develop a strategic plan for assessment;
- serve as a resource for Student Affairs staff interested in generating assessment projects;
- coordinate assessment efforts with the Office of Institutional research and Student Voice; and
- advise the Vice Provost for Student Affairs on assessment related issues.

Of course, the specific roles will likely evolve as we move forward. In the near term, however, the committee will focus on two important projects including the development and implementation of division-wide key performance indicators and the creation of a multi-faceted assessment of the Core Competencies. Strategies for both of these projects will be further formulated after consultation among the committee, John, and Annemieke.
