

PANHELLENIC RECRUITMENT 2017

300 potential
new members

women
received bids **232**

204 received first
preference

received second
preference **28**

11 were released from the process after not
receiving invitations to the next round

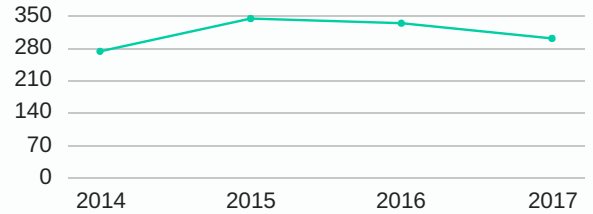

47 voluntarily withdrew from the process
with at least one chapter option remaining

10 completed process without receiving a bid
after listing one of two options as preference

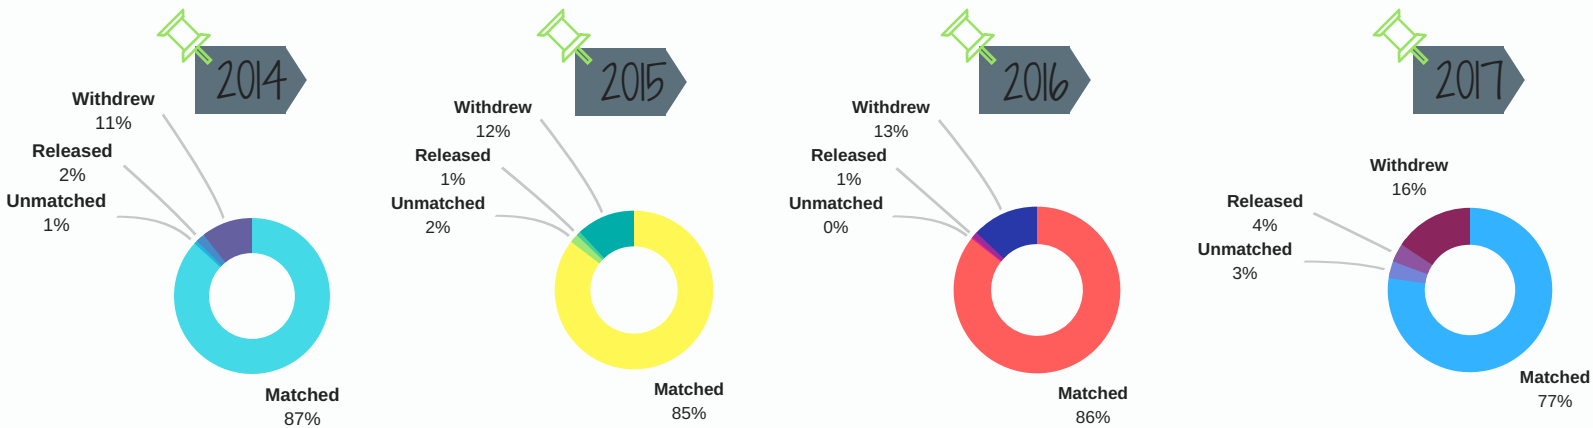

RECRUITMENT TRENDS 2014-2017

To get a better idea of how Panhellenic Recruitment 2017 compares to previous years, take a look at statistics from the last four recruitment processes.

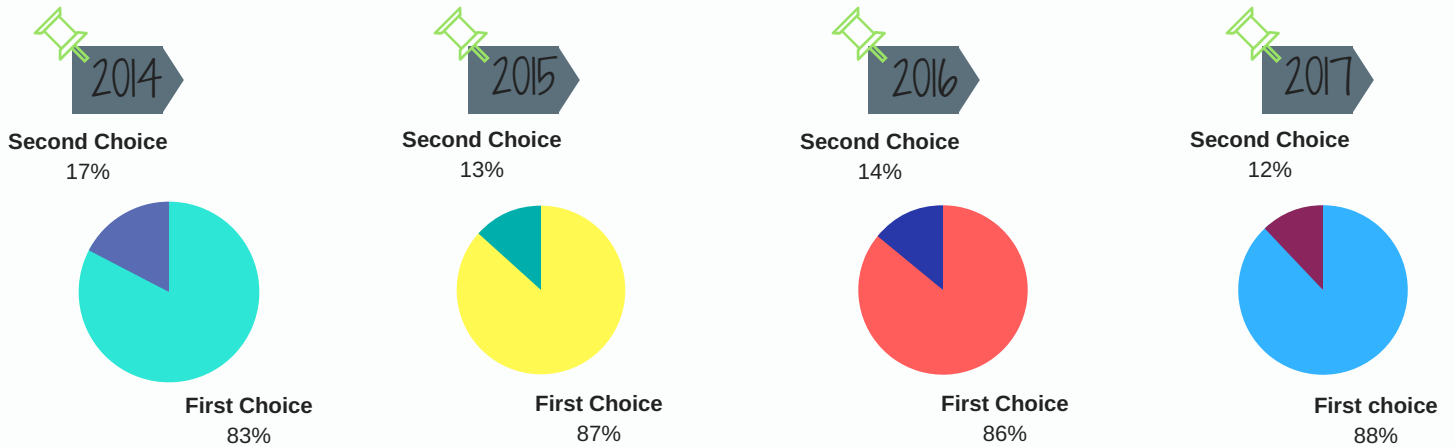

TOTAL REGISTERED PNMS

BREAKDOWN OF REGISTRANTS

BREAKDOWN OF MATCHED BIDS

What this tells us is more PNMs are withdrawing than usual and more women would only accept a bid from one of their two options. For next year, we must increase education of PNMs on the recruitment process so that they begin with an open mind and a better understanding of the mutual selection process.
