SUMMER QUICK FACTS

- Check your Lehigh email for registration information Thursday, August 30
- Seminar begins the week of September 10-14, 2018
- Staff or faculty and a student leader facilitate each seminar group
- You will meet individually with your faculty or staff facilitator and a peer leader during the fall semester
- SYMPOSIUM Friday, August 24, 3:30pm - 4:30pm

A CHEMIST’S MUSINGS ON THE MAMMALIAN SENSE OF SMELL
Presented by Professor Gregory Ferguson
STEPS 101
The 2004 Nobel Prize in Medicine and Physiology, awarded for uncovering the olfactory system, provides a delightful opportunity to reflect on the different kinds of thinking involved in systematic advances and about discovery. It also serves as an example of new understanding waiting from field into another.

THINKING THROUGH TECHNOLOGY
Presented by Professor Greg Ramirez
Rauch O61
An new technologies changing our views of metaphysics (what’s real) and morality (what’s right). Participants in this session will discuss how recent advances in fields such as neuroimaging, virtual reality, artificial intelligence, and social networking might be changing how we see ourselves and how we approach the choices we face.

LEARNING HOW TO LEARN
Presented by Professor James Jamieson
Packard 416
Many new Lehigh students are shocked when they find out that the strategies they used for learning in high school no longer work in college. This seminar will teach you techniques that will greatly increase your chances for success in the next four years.

100 YEARS OF AEROSPACE ENGINEERING
Presented by Professor Terry Hart
Maginnes 103
The progress made in the past 100 years of aerospace engineering has been nothing short of spectacular, from the Wright brothers, to the landings on the Moon, deep space probes and rovers on Mars, as well as many commercial successes, including Boeing’s 787 Dreamliner. Professor Hart reviews this history and shares many of his personal stories of his involvement.

ENTREPRENEURSHIP, CREATIVITY, AND INNOVATION
Presented by Professor Pat J. Costa
Kauf 137
Students at Lehigh have created new products, biomedical implants and greener buildings? Attend, and cryogenically frozen marshmallows lead to better engineering of materials are critical to our society. This session will examine how advances in the science and engineering of materials is critical to our society. How can understanding liquid nitrogen ice cream and cryogenically frozen marshmallows lead to better biomedical implants and greener buildings? Attend, eat, and discuss!

SHAKESPEARE IN LOVE?
Presented by Professor Augustine Kipa
Maginnes 480
This interactive session will dissect one or more Shakespearean sonnets to discover and express the deep, true meanings. Oral interpretation and light performance will be utilized. Come ready to SPEAK!

YOUR REALITY ISN’T REAL. REALLY!
Presented by Professor Jeremy Littau
Rauch 241
What we call reality is increasingly built on the shaky ground of low news use, echo chambers and performing for social networking pen (think Instagram). We’ll explore how media shapes our worldview, why a more mediated society creates upheaval, and how we coexist when it’s harder to agree on facts.

DISRUPTIVE INNOVATION & YOU
Presented by Professor Joshua Etting
Maginnes 290
Learn how disruptive innovation is fundamentally changing your life, career and environment and how you can capitalize on these exciting potential opportunities.

ACING COLLEGE THROUGH PSYCHOLOGICAL SCIENCE
Presented by Dr. Jessica Marsh
Maginnes 112
What is the best way to study? How do you learn new things? How do you mentally prepare yourself to succeed in college? All of these questions are answered through psychological research. This lecture provides pro tips of how to excel at college through the power of psychological science.

HOW NEIGHBORHOODS KEEP US HEALTHY... OR MAKE US SICK
Presented by Professor Karen Beck Pooley
Maginnes 270
City planning and public health grew up together in the late 1800s, but the fields parted ways as planners focused on modernizing cities and health professionals focused on biology and medication. Nearly a century after their split, though, both are realizing the profound role that neighborhoods play in shaping residents’ physical and mental health. How can the two professionals team up again to keep people and places healthy?

BILINGUALISM
Presented by Professor Barbara Matt
Rauch 271
One of science’s last great frontiers is the human mind. We’ll talk about how cognitive scientists explore minds, brains, and intelligence. Then we’ll dive into bilingualism as an example. How do people learn second languages? How do bilinguals juggle their languages and express thoughts in words in two different ways?

STEPS 150
Dude... Every time you learn new information, you change your brain. Over the next four years, you will be grappling with new challenges that will shape your brain. Research from neuroscience and psychology focuses on this process, and applying this research to your life can help you become the person you want to be when you graduate.

FINDING YOUR PASSION, SHARING YOUR VISION
Presented by Dr. Sarah Stanlick
Maginnes 111
This workshop will focus on identifying what makes you tick, how to focus that energy into positive change, and how to work with community partners to make that vision happen. Specifically, an emphasis will be placed on social change modeling, ethical engagement, and civic agency.

SUSTAINABILITY AND THE PURPOSE OF A BUSINESS
Presented by Professor Dave Heinrichs
Maginnes 260
What is the purpose of a business? Is there a single purpose, or should there be multiple objectives. We will also explore what role various stakeholders play in these decisions and how the sustainability movement has impacted this interaction.

BIPOLARITY AND THE WAY WE THINK
Presented by Professor John Scudder
Packard 416
What do bipolar disorder and creativity have in common? What role does language play in our understanding of mental illness? This session will explore the intersection of bipolar disorder and creativity through a unique dialogue between a psychiatrist and a creative professional

Mysteries of the Mind: Exploring Bilingualism
Presented by Professor Barbara Matt
Rauch 271
One of science’s last great frontiers is the human mind. We’ll talk about how cognitive scientists explore minds, brains, and intelligence. Then we’ll dive into bilingualism as an example. How do people learn second languages? How do bilinguals juggle their languages and express thoughts in words in two different ways?

Gaming Your Brain
Presented by Dr. Nancy Carlisle
Rauch 271
Dude... Every time you learn new information, you change your brain. Over the next four years, you will be grappling with new challenges that will shape your brain. Research from neuroscience and psychology focuses on this process, and applying this research to your life can help you become the person you want to be when you graduate.

Finding Your Passion, Sharing Your Vision
Presented by Dr. Sarah Stanlick
Maginnes 111
This workshop will focus on identifying what makes you tick, how to focus that energy into positive change, and how to work with community partners to make that vision happen. Specifically, an emphasis will be placed on social change modeling, ethical engagement, and civic agency.

Myth of the Mind: Exploring Bilingualism
Presented by Professor Barbara Matt
Rauch 271
One of science’s last great frontiers is the human mind. We’ll talk about how cognitive scientists explore minds, brains, and intelligence. Then we’ll dive into bilingualism as an example.
