Identity Development

Personal Branding - "The Need to be Different"
Professor Steven Savino
Rauch 137
No matter what major you choose, Personal Branding is about how to differentiate oneself such that you are better positioned for Job and/or Summer Internship placement. Personal Branding enables students to uniquely develop a career growth plan, with tips on how to win their desired job or internship.

How to Manage Your Energy: A Global Perspective
Dr. Lina Rodriguez
Magness 480
To create, impact, and contribute, you need to get your own energy together. Around the world, indigenous groups and others think in energetic terms. In this session, based in Ayurvedic teachings, learn what your personal energy pattern is, how that looks out of balance, and how to redirect it.

Bioengineering the Future
Professor Tommy Pachuck
STEPS 290
Improving health is one of the great scientific and engineering challenges. This will require a better understanding of the human body, earlier diagnosis, and new types of therapies. Come find out how bioengineers are inventing the technologies that will help people around the world live longer, healthier lives.

The Corporation & Society
Professor Dave Nekritz
Rauch 271
We will examine the theory that maximizing shareholder value is primary in defining the role of the corporation in contrast to proponents who argue that the corporation's role is to work for the betterment of all its stakeholders, employees, customers, society in addition to the shareholders.

100 Years of Aerospace Engineering
Professor Tony Hart
Magness 111
The progress made in the past 100 years of aerospace engineering has been nothing short of spectacular, from the Wright brothers, to the landings on the Moon, new space probes and rovers on Mars, as well as many commercial successes, including Boeing's 787 Dreamliner. Hart reviews this history and shares many of his personal stories of his involvement.

Getting to Know Your New Neighborhood: A City Planner's Perspective
Professor Karen Beck Pockey
Packard 208
Our neighborhoods play a huge role in our physical and mental well-being, access to opportunity, and ability to connect with those nearby. These places don't just shape us; we shape them. Hear more about South Bethlehem and how you might put your own stamp on it while at Lehigh.

Stronger, Smarter, Faster, and...Greener: Materials Science and Engineering does it all!
Profs. Nick Strandwitz, Siddhi Pimpukar, Lesley Chew, Sabrina Jedlicka
Whitaker 303
What do ultra-strong materials for flying vehicles, smart quantum materials, and radical production of multi-story tall rocket engines, and tasty ice cream have in common? They all start with the newest revolutions in Materials Science and Engineering! Come learn about how materials science has repeatedly revolutionized society!

Acing College Through Psychological Science
Dr. Jessica Marsh
Packard 258
What is the best way to study? How do you learn new things? How do you prevent yourself from succeeding in college? All of these questions are answered through psychological research. This lecture provides tips on how to excel at college through the power of psychological science.

Where are we going to put all of that carbon?
Professor Frank J. Pazzaglia
STEPS 180
Humans are currently dumping about 50 billions of metric tons per year of carbon into the atmosphere. To prevent the worst effects of global warming, humans need to be extracting about 20 billions of metric tons of carbon by 2100. Who among the next generation of Lehigh students will help us figure out how to do that?

Thinking through Technology
Dr. Greg Rothman
Magness 101
Are new technologies changing our views of what's real and what's right? Participants in this highly interactive session will discuss how recent advances in fields such as neuroimaging, virtual reality, artificial intelligence, and social networking are affecting how we see ourselves and how we approach the choices we face.

Entrepreneurship, Creativity & Innovation
Professor Pat J. Costa
Rauch 241
Students at Lehigh have created new products, technologies, apps... and launched companies while they were undergraduates! How does that work? What (and why) do you need to know if you want to start something new? Come to this interactive session to discuss how to make the next big thing happen while you're at Lehigh.

Making Museums Matter
Professor William Crow
Main Gallery, Zeiller Arts Center
Museums are no longer dusty storage houses of the past. They are places that spark creativity, curiosity, and new knowledge on topics that are relevant to our world. Discover the Lehigh University Art Galleries and how you can get involved!

So, you want to use your STEM degree as a springboard to professional school?
Professor Lawrence Tartaglia
STEPS 102
Some of us have wanted to go to professional school (e.g., Medical, Dental, Graduate, etc.) for as long as we can remember, while others might figure out their paths during, or after college. But do you know what it takes to get there? In this session we will look at historical trends, admissions standards, and the unique aspects of an application (e.g., CV) that will help you stand out among a sea of highly qualified candidates!

The Magnetism of Rocks and Earth History
Professor Ken Kodama
STEPS 101
Scientists can measure the ancient magnetism of rocks that was acquired when they formed. This fossil magnetism, or paleomagnetism, is used to determine the ancient direction and intensity of the Earth’s magnetic field. It is used to reconstruct the ancient geography of Earth’s continents, the movement of far-travelled micro-continents, the tectonic rotation of regions, and the timing of the nucleation of Earth’s solid inner core.

A Chemist's Musings on the Mammalian Sense of Smell
Professor Greg Ferguson
STEPS 280
The Nobel Prize in Medicine and Physiology awarded a few years ago for unveiling the olfactory system provides a delightful opportunity to reflect on the different kinds of thinking involved in systematic advances and abrupt discoveries. It also serves as a wonderful example of new understanding "catching" from one field into another.

Ghost Sickness...Yes, It's Real
Professor Christine Daley & Joan Daley
Magness 112
Have you ever wondered what it’s like to interact with a ghost? Can they make you sick? According to you and others all over the world, they can. Come learn what it means to have ghost sickness and take a look at evidence from more than a decade of paranormal investigations.

Professional Growth & Success

AI will destroy the world! AI will save the world!! What should we believe?
Professor Daniel Lupesi
STEPS 490
Artificial Intelligence will have a huge impact on our society. Is this a good thing, or something to be feared? What are the responsibilities of the developers of such technologies? What does an educated person need to know? Bring your curiosity and your questions for this interactive 5x10 Symposium.

Wanna be an artist? Come learn about all the Marcon Institute has to offer
Professor Heliona Ochs
Chandler Ullman 118
The Marcon Institute’s core activity is to prepare and deploy scholars, the Marcon Fellows, who show dedication to research that influences perspectives, practices, and policies on social justice. Listen to our vision for supporting students in their artist’s work and learn how to get involved!

(What) Does Musical Theatre Matter?
Dr. Bill Whitney
Magness 102
Musicals - you probably either love, hate, or ignore them. But whether you can sing Schönberg in the shower, or one rampant from Rodgers and Hammerstein, the American musical theatre is undeniably a meaningful cultural force that reveals truths about our culture, society, and history. In this session, we’ll discover why!

Public Health Probabilistic Forecasting
Professor Tim adjacent
Magness 113
In this symposium we will discuss the role probabilistic forecasting plays in public health decision making. We will explore how compartmental and statistical models produce forecasts, and we will explore probabilistic forecasting—forecasts that are a combination of computational models and human judgement.

Why We Don’t Eat Cats
Professor Ziad Munson
Packard 466
Bet you’ve never tasted the sweet flesh of a cat! But why? People eat all sorts of different animals, so why not our feline friends? The answer lies in the social construction of reality. Join me for a discussion of food, cats, and what it means to truly perceive the real world.

Living Sustainably
Professor Anne Mentzer
Magness 270
What does it mean to live sustainably and why does it matter? In this 5 x 10, we’ll explore sustainability through the lens of Earth and environmental science. We’ll examine how Bethlehem and Lehigh are incorporating sustainability into city and campus decision making, and how decisions we make move us toward or away from a sustainable future.

Inclusive Leadership

So, what is leadership? What are the qualities of a good leader? How can you become a leader? What role does leadership play in your personal and professional life? These are just a few of the questions that will be discussed in this interactive 5x10 Symposium.
